**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a composition having degradative activity towards a varied group of toxins, classified in class 424, subclass 93.1.
- II. Claims 6-12, drawn to a method of reducing amount of a toxin in an environment of which is a toxaphene or TCE or methylene chloride, classified in class 210, subclass 601.
- III. Claims 13-20, drawn to a method of identifying an inhibitor of a mammalian pathogenic fungus, classified in class 435, subclass 252.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the bacterial strain can be used in a materially different process such as the control of plant disease. There is one way distinctness between the product of Group I and processes of Groups II-III.

There is two way distinctness between Groups II and III wherein the process steps of Group III are carried out on a mammal and the process steps of Group II are

Art Unit: 1651

carried out on contaminated ground water. Also Group II is directed to bioremediation of an environment and Group III is directed to a treatment of an animal. There is a heavy burden placed upon the examiner to search these different inventions and this burden has become evident to the examiner in light of Applicants' amendments of June 18, 2004.

There are different toxins to be searched and the claims of Group II further define an environment which generally would exclude a mammal. Mammals are not typically found living in ground water, for example. Each of the inventions are distinct and are placed in separate classes for searching purposes which places a serious burden on the examiner to search for all of these different inventions, especially in light of the newly added amendments.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is 571-272-0924. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
